

Winterization Contract 2011

Check the services you would like performed, according to pool size & cover type: *chemicals & antifreeze included*

Full Service Winterization : Drain water below returns, final season vacuum not to exceed 30 minutes, winterize equipment that remains outside and all pool lines by removing excess water and instilling biodegradable antifreeze, 6 gallons antifreeze included. Remove all handrails, ladders, baskets, & cover diving boards with plastic. Above ground pools with removable systems will be disconnected and hoses removed from pool (heater remains in place) , additional winterization services available- see below. Install plugs and aquadoors. Final water test performed and closing chemicals added (included) & winter cover installed. Pools that have auto covers require the homeowner to fill the water back up to the appropriate level after winterization.			
Modified Winterization Services : Homeowner is responsible for lowering the water level 1" below the returns prior to the closing date. Water that is not lowered will result in an additional charge of \$185.00 (no exception). NO vacuum will be done with this service. Remaining services as stated above will be performed including closing chemicals and antifreeze up to 6 gallons.			
Please check if you have a solid cover with water bags , please add \$60.00 on to the price below for your pool size **
